

**BOLTED STORAGE
SYSTEMS**

Design and manufacture products according to the exact specifications and expectations of our customers in order to build long-term partnerships that keep Cresswell financially sound and competitive in all its business sectors.

Ingenuity

Cresswell Industries surpasses itself through the ingenuity of its employees, the constant innovation of new products and its ability to adapt to changes.

6

Durability

Cresswell stands out for the quality and durability of its products, making it a trusted company since 1951.

Reliability

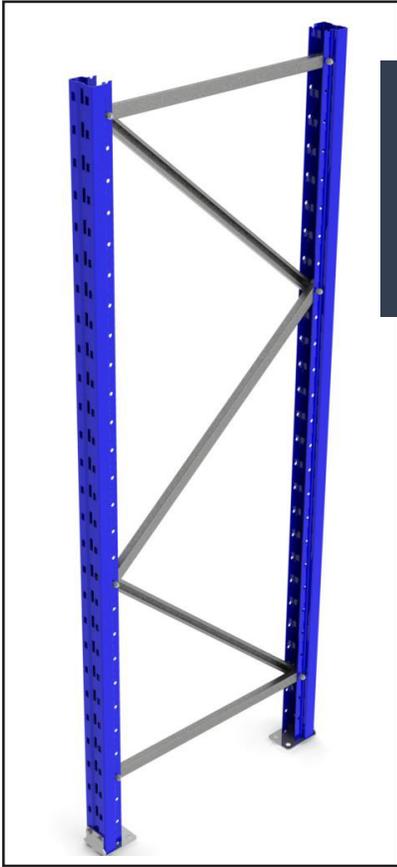

Its commitment to its customers, employees and the environment make it an honest, loyal and consistent company that ensures its steadiness in the steel processing industry.

8

BOLTED

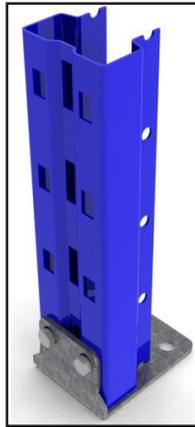

Bolted systems are the most versatile racking option. It can be shipped assembled or knocked down. It allows different material finishes for posts and bracings. Damaged components can be replaced on site quickly and at low cost.

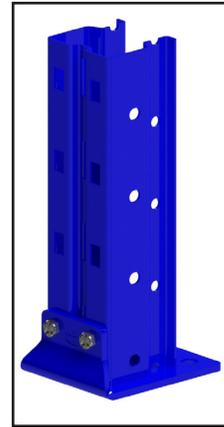

Post sizes 3.25 x 2.69" and 3.25 x 3.25" are presently available. Each of them comes in a variety of steel gage depending on weight capacity requirements.

OPTIONS

BASE PLATE AND PROTECTION

A variety of baseplates and protection accessories are available for bolted or welded systems.

PRE-GALVANIZED FINISH

Posts and bracings can be manufactured with pre-galvanized steel instead of painted for bolted systems only.

Pre-galv is not presently available for double posted systems or posts requiring a welded base plate.

BOLTED ADVANTAGES

1.

LOWER TRANSPORT COSTS

Shipping bolted unassembled frames as components allow space optimization, requiring less trucks for delivering your material to site.

2.

SHORTER LEAD TIMES

Bolted systems being manufactured as components maximize the paint process time and reduce production time.

PRE-GALVANIZED

Bolted systems can be manufactured out of pre-galv steel offering you the best available lead time with all the advantages of pre-galv.

3.

4.

FAST AND LOW COST REPAIRS

Damaged components can be replaced on site quickly and at low cost unlike welded systems.

5.

VERSATILITY

Bolted racking systems can be configured at will, offering a solution tailored to your needs and application, permitting low cost upgrades and expansions.
